SUMMARY

Full Stack MERN Developer with hands-on experience building backend systems and responsive web applications using Node.js, Express.js, MongoDB, Mongoose, React.js, and Tailwind CSS. Experienced in developing RESTful APIs, JWT-based authentication, API key authorization, media uploads, URL shortening, analytics, and modular MVC architectures. Strong foundation in database design, authentication and authorization, API development, and software engineering fundamentals.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C++, Python, C, HTML, CSS

Frontend Development: React.js, Tailwind CSS

Backend Development: Node.js, Express.js, RESTful APIs

Databases: MongoDB, Mongoose, SQL

Authentication & Security: JWT, Cookies, API Key Authentication, Authorization

Developer Tools: Git, GitHub, Postman, VS Code, Figma

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, MVC Architecture, API Design, Authentication & Authorization

EDUCATION

VIT Bhopal University

Bachelor of Technology - Computer Science and Engineering

CGPA: 9.28/10

Bhopal, Madhya Pradesh

September 2024 - July 2028

PROFESSIONAL EXPERIENCE

COSMIC365

Software Engineering Intern

Remote

Feb 2024 - Aug 2024

- **Full Stack Development:** Built scalable software modules using React.js and Node.js, reducing page load times by 30%.
- **API Architecture:** Designed RESTful APIs and optimized middleware logic, improving server response time by 40%.
- **Database Optimization:** Enhanced PostgreSQL/MySQL query performance through indexing, achieving nearly 2x faster retrieval speed.

TECHNICAL PROJECTS

Video Player & Streaming Backend – YouTube-Inspired Platform

[GitHub](#)

Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary

- **Backend Development:** Built RESTful APIs for core platform features including video management, authentication, playlists, subscriptions, comments, likes, and community posts.
- **Authentication & Security:** Implemented JWT-based authentication and route-level authorization, securing user-specific API resources from unauthorized access.
- **Media Management:** Built a cloud-based media upload pipeline using Multer and Cloudinary for video and image storage.
- **Architecture:** Designed a modular MVC-based backend architecture, improving separation of concerns and maintainability across application modules.

LinkSwift – URL Shortener & Analytics API

[GitHub](#)

Node.js, Express.js, MongoDB, Mongoose, JWT, NanoID

- **URL Shortening:** Developed a RESTful URL shortening API with unique short-link generation and dynamic redirection using Node.js, Express.js, MongoDB, and NanoID.
- **Authentication:** Implemented JWT-based authentication and API key authorization to secure protected API endpoints and resources.
- **Analytics:** Built MongoDB aggregation pipelines to transform URL interaction data into structured analytics for tracking link performance.
- **Backend Architecture:** Designed a modular REST API architecture with centralized error handling, improving code organization and maintainability.

E-Commerce Backend API

[GitHub](#)

Node.js, Express.js, MongoDB, Mongoose, JWT

- **RESTful APIs:** Developed RESTful APIs supporting end-to-end e-commerce workflows, including authentication, product management, shopping cart, and order processing.
- **Authorization:** Implemented JWT-based authentication and protected routes, ensuring secure access to user-specific resources and operations.
- **Backend Architecture:** Built a modular Express.js and Mongoose backend architecture, improving separation of concerns and maintainability across API modules.
